VITHUN S K

Full Stack Developer | React · Node.js · Express · MySQL

+91 9952128266 | vithunkumar07@gmail.com | Chennai, Tamil Nadu | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-Stack Developer with hands-on experience building and deploying web applications using React, Node.js, Express.js, and MySQL. Designed and shipped RecruitHub, a full-stack recruitment platform with JWT authentication, role-based access control across 3 user roles, and 15+ REST API endpoints. Experienced across the application stack, including normalized database schema design, responsive frontend development, REST API development, and cloud deployment using Vercel and Render. Solved 100+ Data Structures and Algorithms problems in C++ and selected for the live evaluation round at Ampyo Hackathon, placing in the top 200 of 1,000+ registered teams. Earned 5 MongoDB skill badges covering MongoDB fundamentals, RAG, AI agents, AI data strategy, and vector search.

TECHNICAL SKILLS

Languages: C++, C, Python, JavaScript (ES6+)

Frontend: React.js, HTML5, CSS3, Chart.js, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, REST API Design, JWT Authentication, Role-Based Access Control, Middleware

Databases: MySQL, MongoDB, Database Design, Normalization

AI: Groq API Integration, LLM-Based Classification, Prompt-Based Classification

Tools & Platforms: Git, GitHub, Vercel, Render, Postman, VS Code

Currently Learning: TypeScript, Next.js, Docker, PostgreSQL

PROJECTS

RecruitHub – Full-Stack Recruitment Management System GitHub

React.js · Node.js · Express.js · MySQL · JWT · REST API · JavaScript

- Implemented JWT-based authentication with role-based access control (RBAC) for 3 user roles (Admin, HR, Candidate), securing 10+ protected REST API routes through middleware-level authorization.
- Designed and built 15+ RESTful API endpoints using Node.js and Express.js covering CRUD operations for job postings, application submissions, and application status workflows.
- Integrated MySQL with a normalized relational schema and developed separate role-based dashboards supporting application state transitions from Applied to Shortlisted or Rejected.

ScamShield – AI-Powered Scam Detection Platform GitHub | Live

React.js · Node.js · Express.js · MongoDB · Groq API · JavaScript

- Built an AI-powered scam detection platform using the Groq API to classify suspicious messages and identify potential fraud patterns.
- Developed a full-stack pipeline connecting a React frontend to an LLM-backed classification service through a Node.js/Express.js API layer.
- Documented system architecture, setup, and usage in a structured README to support reproducibility and maintainability.

Wealthio – Personal Finance Tracker GitHub | Live

React.js · JavaScript · Chart.js · HTML5 · CSS3 · localStorage

- Integrated Chart.js to create 3 interactive chart types (bar, pie, and line) for expense breakdowns, spending trends, and savings-rate visualization.
- Implemented persistent client-side data storage using the browser localStorage API without requiring a backend dependency.
- Built a responsive component-based React interface with state-driven transaction updates across mobile and desktop layouts.

ACHIEVEMENTS

- Solved **100+ LeetCode problems** across Data Structures and Algorithms using C++ [View Profile]
- Selected for the **live evaluation round at Ampyo Hackathon**, placing in the **top 200 of 1,000+ registered teams**.
- Earned **5 MongoDB Skill Badges** from MongoDB University, including RAG, AI agents, AI data strategy, and vector search.

EDUCATION

B.Tech – Computer Science Engineering 2024 – 2028
SRM Institute of Science and Technology, Ramapuram, Chennai **CGPA: 9.35/10**

Higher Secondary (12th Standard) 2024
The Modern Academy Matric Higher Secondary School, Namakkal **Percentage: 86.5%**
