PROFESSIONAL SUMMARY

Computer Science undergraduate with a 9.35 CGPA and hands-on experience developing full-stack web applications using Java, Spring Boot, React, Node.js, and MySQL. Built REST APIs, implemented JWT-based authentication and role-based access control, and developed projects spanning recruitment management, project collaboration, and AI-powered scam detection. Solved 100+ Data Structures and Algorithms problems using Java.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), Python

Frontend: React.js, HTML5, CSS3, Responsive Design, Chart.js

Backend: Spring Boot, Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC)

Databases: MySQL, MongoDB

Tools: Git, GitHub, Postman, VS Code, Vercel, Render

AI Integration: Groq API, LLM-Based Classification

EXPERIENCE

Web Development Lead | Logic Players, SRM Institute of Science and Technology — September 2026 – Present

- Coordinate software development activities with club members and contribute to planning technical projects and initiatives.
- Support collaborative problem-solving and help organize development tasks to keep technical work progressing.

PROJECTS

FlowSync – Collaborative Kanban Board — GitHub

React.js · Spring Boot · Java · MySQL

- Developed a collaborative Kanban board with task assignments, priorities, deadlines, and project progress tracking.
- Built REST APIs using Spring Boot and integrated MySQL to manage project, task, and user data.
- Implemented authentication and role-based authorization to control access to project resources.

RecruitHub – Full-Stack Recruitment Management System — GitHub

React.js · Node.js · Express.js · MySQL · JWT · REST APIs

- Implemented JWT authentication and role-based access control for Admin, HR, and Candidate roles, securing 10+ protected API routes.
- Developed 15+ REST API endpoints for job postings, applications, and application-status workflows using Node.js and Express.js.
- Designed a normalized MySQL schema and built role-specific dashboards to manage recruitment workflows.

ScamShield – AI-Powered Scam Detection Platform — GitHub

React.js · Node.js · Express.js · Groq API

- Integrated the Groq API into a scam-detection workflow to classify suspicious messages and identify potential fraud indicators.
- Developed a React frontend and Node.js/Express.js backend to process user-submitted messages and return classification results.

ACHIEVEMENTS

- Solved **100+ LeetCode problems** in Data Structures and Algorithms using Java. [View Profile]
- Secured **3rd place at ICKATHON**, conducted by SSN College of Engineering; selected for the **live evaluation round at Ampyo Hackathon**, ranking among the **top 100 of 1,000+ registered teams**.
- Earned **5 MongoDB University Skill Badges** covering RAG, AI agents, AI data strategy, and vector search; participated in **8+ hackathons**.

EDUCATION

B.Tech – Computer Science Engineering — 2024 – 2028
SRM Institute of Science and Technology, Ramapuram, Chennai — **CGPA: 9.35/10**

Higher Secondary (12th Standard) — 2024
The Modern Academy Matric Higher Secondary School, Namakkal — **Percentage: 86.5%**
